

CS-104: Certified ISO 27001 ISMS Foundation Training Course

Training course outline

Learn about ISO 27001:2013 best practice and how to achieve compliance with the Standard, with our popular foundation Live Online or classroom course. It provides a complete introduction to the key elements required to achieve compliance, including:

- Understanding management system documentation and the requirements of ISO 27001;
- Planning, scoping and communication throughout your ISO 27001 project; and
- The key steps involved in an ISO 27001 risk assessment.

Please note that this course is based on ISO/IEC 27001:2013. For an introduction to the recently published ISO/IEC 27001:2022 standard, please see our Certified ISO 27001:2022 ISMS Foundation Training Course.
